# FLOOR SYSTEMS

## Rigid composite cores flooring

MCCI-TEK Floor Systems use rigid composite cores with patented click-lock installation. Designed for dry installation without adhesives or curing time. All systems are 100% waterproof and compatible with underfloor heating.

- Rigid composite cores (SPC or WPC) with multi-layer robust construction
- Patented Unilin click-lock systems - glueless, gap-free installation
- Factory-bonded IXPE acoustic underlay
- Installs over flat, stable subfloors and most existing hard flooring
- Compatible with underfloor heating (maximum 25°C surface temperature)
- Multi-layer robust construction - won't splinter, warp, or crack
- Phthalate-free, 100% recyclable
- Matching accessories available

# MCCI-TEK™ FLOOR & WALL PANEL SYSTEMS

## FLOOR FEATURES & BENEFITS

**100% Waterproof** – utilising revolutionary waterproof core technology can be used in almost all wet areas.

**Locking System** – the glueless locking system ensures boards click together easily, forming flush, gap-free joins.

**Quick & Easy to Install** – simply install straight from the pack, leaving no DIY skills and saving time and money.

**Built-in Underlay** – premium IXPE underlay makes installation simple, saves money and creates a soft and comfortable feeling underfoot.

**Hard-wearing** – with its multi-layer robust construction and high quality materials it is extremely durable and won't splinter, warp or crack.

**Reduces Noise** – the waterproof core technology and built-in underlay absorb noise transfer, ensuring excellent acoustic performance.

### WPC-CORE Construction
