Stone Plastic Composite (SPC) wall panels

MCCI-TEK Wall Panels provide a dry-installation alternative to traditional tiling for kitchens, bathrooms, and feature walls. Designed for moisture-exposed environments and refurbishment projects.

- Solid SPC core, 2800mm panel height
 - 100% waterproof with integrated anti-fungal protection
 - Lightweight and flexible for smooth adhesion
 - Adhesive-fixed installation to prepared wall substrate
- Heat resistant – suitable behind cookers, worktops, and as kitchen splashbacks
 - Scratch, stain, and fade resistant surface
 - Easy to clean with standard cleaning agents
 - 24 colours and designs
